Why BAW Congress is Different

Organized By BioAg Professionals

Exclusively planned and managed by passionate BioAg professionals and Sustainable Farming Influencers, not just non-industry event organizers.

Fully Integrated Sustainability Event

Showcasing integrated sustainable smart farming: Biofertilizers, Biostimulants, Biopesticides and Precision AgTech, as part of one toolbox together.

Key Stakeholder Engagement

Brings together farmers, agronomists, retailers, innovators, policy makers, regulators, business leaders, marketers, investors and the food chain industry.

Recognizing Sustainable Champions

Honors main stakeholders of sustainable farming by awarding best Global Sustainable Grower, Exceptional Business Leader, Pioneering Innovator and a Poster Presenter, through independent voting.

Comprehensive Agenda and Program

Morning focus workshops and afternoon sessions, merging science, innovation, engaging roundtables, insightful keynotes, innovations, industry trends, investor and leadership experiences. Evenings of networking, awards, and fun factor.

Balanced Congress and Expo Focus

All day enjoy a balanced & equal focus on match-making, networking, and expo, complemented by a thoroughly planned, comprehensive, and in-depth congress that integrates key topics, must-win battles, and critical success factors.

Globally Regional Approach

With an annual rotation across continents, the event focuses deeply on regional challenges and opportunities from both global and local perspectives. It brings together global solution seekers and providers with the regional ecosystem.

Ongoing Think Tank Collaboration

Ongoing Global Regulatory and Leadership Think Tanks drive actionable dialogue and deliverables for tangible grower solutions.

“Each year moving to a new ecosystem, new continent, with new farming needs, innovations, opportunities and alliances — a truly global event, with new regional mix, organized with local stakeholders: by the industry, for the industry.”
